

**BROOKHAVEN HOSPITAL**  
**EMTALA NRI Transfer Report**  
**2016**

**INTRODUCTION**

In order to assure NRI patients receive necessary medical stabilization and treatment that falls outside the scope of the Brookhaven facility, transfers to medical/surgical facilities occur as needed. Brookhaven management reviews this data per occurrence. The following tables summarize these events.

<b>Emergency Transfers Out 2016</b>	
Total NRI pt transfers out	29

**Table Notes**

- Data compiled from Emergency Patient Transfer Log (see log for detailed report).

<b>Reasons for Transfer Out - Origin</b>	
Medical Stabilization in ER	16
Medical Treatment Needed	11
Assessment of Mental Status	2
Total Transfers	29

**Table Notes**

- Transfers from NRI generally transfer via EMSA.
- Transfers from NRI will either be stabilized in medical/surgical facility ER or admitted in order to receive ongoing treatment pending outcome of evaluation.

**CONCLUSION**

Medicare, CARF and EMTALA regulations require review of the data. It is an ongoing process to ensure adherence to applicable laws and regulations, and is a part of our overall goal to provide quality patient care.

Respectfully submitted,

L. Chris Cannida, M.S., LPC  
 Admissions Supervisor
